Abstract

This study examines the special announcement for women in the Chhattisgarh Budget 2026-27, with a focus on their potential contribution to women's empowerment and inclusive socio- economic development. The study aims to analyse women-centric budgetary provision in education, healthcare, economic development, employment and social welfare. Particular attention is given to initiatives such as the Rani Durgavati yojana, Mahatari vandan yojana, and many more reduction in property registration fees for women and the establishment of mahatari sadans to support women's self- help groups. The study adopts an exploratory design using qualitative and quantitative approaches based on secondary data. Collected from government budget documents, policy reports, research articles, journals and other published sources. The finding indicates that the 2026-27 budget reflect a shift from traditional welfare towards greater, financial security, assets ownership, educational opportunities are economic independence for women. However, challenges such as inadequate awareness, administrative, delays, financial constraints and weak monitoring mechanism may effect effective implementation.

Keywords: Gender Budgeting, Women Empowerment, Chhattisgarh Budget 2026-27, Government Schemes etc.

INTRODUCTION

"Gender equality is more than a goal in itself. It is a precondition for meeting the challenge of reducing poverty, promoting sustainable development and building good governance."- Kofi Annan. "We cannot all succeed when half of us is held back". - Malala Yousafzai. These quotations illustrate the unavoidable role that women play in a nation's growth. Smt. Nirmala Sitharaman, Finance Minister of India, also stated that – "There is no chance for the welfare of the world unless the condition of women is improved it is not possible for a bird to fly with one wing."

In India, gender budgeting has become a vital tool for promoting inclusive development and gender equality. In 2005-06, the Ministry of Finance of the Government of India formally

established the idea of gender budgeting, indicating a change from welfare-oriented approaches to a systematic integration of gender perspective into fiscal planning. Gender budgeting does not imply a separate budget for women rather, it ensure that public expenditures and policies address gender disparities and promote equitable resource allocation. This method breaks down budget using a gender lens, make sure that funds are allocated to women's economic participation, health, education and empowerment. By 2026, it has evolved into a constitutional imperative under Article 15(3), influencing over 20 states, including Chhattisgarh, to prioritize equity amid rising demand for inclusive growth.

Women-centric policies in state government budgets are vital because state government play a direct role in implementing welfare schemes. State budgetary policies have a big impact on women's access to financial inclusion, healthcare, employment and education. Additionally, regional objective are reflected in state budgets, allowing for customized interventions for people at risk including rural, tribal and economically weaker women. Initiatives like maternal health programs and subsidies for self-help groups increase multiplier effect on GDP studies from NITI Aayog estimates that every 10% increase in female labour force participation boosts GDP 1% to 2% annually. By using women's responsibility in MSMEs and agriculture, they promote sustainable development in states with limited resources.

Chhattisgarh was established in 2000, distinguished by a substantial tribal population, rural dominance, and varying levels of socio-economic development. This state has made improvements in areas like rural welfare, public distribution systems, and food security, but still has issues with maternal health, female literacy, gender-based employment discrimination and women's limited access to higher education and entrepreneurship opportunities. In Chhattisgarh a significant number of women are employed in self-help group organization, agriculture and unorganized labour, sometimes with lacking financial and social securities.

Special Announcements on women's empowerment and financial involvement are include in the Chhattisgarh Budget 2026. These measures may include direct financial aid, support for self-help groups, skill development, healthcare benefits and encourage women to get education and employment opportunities. It becomes essential for a research perspective to evaluate whether these statements are transformational development toward structural empowerment. The effectiveness of funding method for implementation for long-term impacts on gender equality.

This study examine the effectiveness of the "Special Announcement for women" in Chhattisgarh Budget 2026, which most likely includes improved women's incentive schemes. By using multilevel government finance to assess such announcement and translate statements into measurable empowerment and addresses the gap in state specific post implementation studies and improves future policy making.

LITERATURE REVIEW

Gender budgeting in India develop as a key tool for addressing women's needs through fiscal policy, particularly relevant to analyzing special announcements in state budgets like Chhattisgarh's 2026 allocation. This literature review examines studies on gender budgeting,

prior women empowerment schemes, Chhattisgarh past budget trends for women, and persistent research gaps, providing an analytical lens for the topic.

India introduced gender budgeting in 2005-06 via Gender Budget Statement (GBS), categorizing expenditure into women- specific (Part A 100% allocation) and pro-women schemes (Part B at least 30%). Research highlights progress in raising fiscal awareness but notes still shares of 4-6% of total budgets, concentrated in few ministries like Women and Child Development limiting transformative impact. States like Kerala show better integration through strong institutions, yet national challenges include poor data disaggregation and monitoring.

Prior schemes such as Mission Shakti and Beti Bachao Beti Padhao have boosted awareness and targeted interventions like education and safety. Studies praise their role in inclusive growth but critique inconsistent funding and exclusion of sectors like transport. Union budget 2025-26 allocated ₹ 4.5 lakh crore (8.9% of expenditure) to gender initiatives through outcomes depend on implementation.

Chhattisgarh budgets emphasized schemes like Mukhyamantri Haat Bazar Yojana for rural women, with allocation rising in women specific areas. Analysis focus on health and nutrition but underinvestment in economic empowerment, mirroring national trends of methodological issues in GBS like inaccurate estimates. Political commitment has driven incremental growth.

Literature Gap

Existing studies lack longitudinal impact assessments, especially state specific data for Chhattisgarh on scheme effectiveness. Gaps include insufficient gender-disaggregated outcomes, limited sectoral coverage beyond social welfare and weak links between budgeting and inequality reduction. Future research should prioritize econometric evaluation of 2026 announcements against these voids for evidence based policy.

OBJECTIVES OF THE STUDY

- To examine the special announcement for women in the Chhattisgarh Budget 2026.
- To analyses sector-wise allocation (education, health, employment, entrepreneurship, social welfare).
- To evaluate the expected socio-economic impact on women
- To assess policy implementation challenges.

RESEARCH QUESTIONS

- What are the key provisions introduced for women in Budget 2026?
- How does Budget 2026 compare with previous regarding women-focused expenditure?
- Are the allocations sufficient to address gender disparities?

RESEARCH METHODOLOGY

This study is exploratory in nature and based on qualitative and quantitative approach. This study also relies on review of secondary data and data collection obtained from relevant

published and unpublished document, reports, policy, journals, article, press information and online information.

CONCEPTUAL FRAMEWORK

Women empowerment

Women empowerment involves enhancing women's ability to make choices, access resources and participate fully in economic, social, and political. It refers to the process through women gain control over resources, decision-making, access to opportunities and shaping their lives.

Developing agencies reducing gender inequality and promoting equality through economic, health and educational opportunities are the main goals of women's empowerment. It allows women to take charge of their lives and make contributions to society by changing the power from patriarchal thinking to inclusive. Initiatives like financial inclusion and skill development are based on this concept.

In the Indian context, empowerment includes:

Economic empowerment- Access to income, employment, credit and productive assets.

Social empowerment- Education, health, freedom from discrimination and violence

Political empowerment- Participation in governance and decision-making institutions.

Legal empowerment- Awareness and protection of rights under constitutional and statutory provisions.

The constitution of India guarantees equality under Article 14, 15 and 16 while various national policies such as the National policy for the Empowerment of women and sustainable development.

In the context of Chhattisgarh, women empowerment assumes particular significance due to:

High rural and tribal population.

Gender gaps in literacy and workforce participation.

The rate of poverty in certain districts.

Gender Budgeting Approach

A fiscal strategy known as gender budgeting integrates a gender perspective into government revenue and spending plans. It refers to an evaluation of how budgetary expenditures affect men and women differently rather than a distinct budget for women. Gender budgeting highlights gaps in funding for women's needs, tracks impacts on gender outcomes and promotes transparency in public spending.

Through the gender budget statement in the union budget, gender budgeting was formally established India in 2005-06. Chhattisgarh is among the states that have increasingly implemented this strategy.

Public Policy Analysis Framework

The approaches of planning, formulation, execution and assessment are all used in public policy analysis. The mapping of stakeholders and cost-benefit analysis are two framework that evaluate efficiency, equity and effectiveness. Examining goals, inputs, result and long-term social effects is part of budget announcent.

Link between Budget Allocation and Socio-Economic Development

By providing financing for infrastructure, health care and education all of which promote growth, reduce poverty and enhance welfare-budget allocation promote socio-economic development. Spending that is specifically targeted such as on program for women, improves equity and human resources, which multiply GDP and employment. However as several state –level studies have shown, ineffective implementation may destroy these links.

Gender budgeting in India promotes women empowerment by systematically integrating a gender perspective into fiscal planning, ensuring equitable resource allocation to address women's specific needs and reduce disparities.

Impact on Empowerment

Gender budgeting boosts women's economic participation by funding livelihood programs, improving health outcomes via many schemes and promoting political inclusion. From 2014-15 to 2025-26, allocation grew from ₹0.98 lakh crore to ₹ 4.49 lakh crore (5.46% to 8.86% of the Union Budget), driving inclusive growth and human development. It empowers women by enabling control over resources, risk management, and decision-making, bridging socio-economic gaps.

OVERVIEW OF CHHATTISGARH BUDGET 2026

The Chhattisgarh Budget 2026 (Financial year 2026-2027) outlines the state government budgetary strategy for infrastructural development, social welfare and economic growth. The government priorities for enhancing agriculture strengthening public services and encouraging inclusive development particularly in the states rural and tribal areas are reflected in the budget.

SANKALP is the theme and guiding vision of the Chhattisgarh Budget 2026-27. The state government presented the budget with a total size of about ₹1.72 lakh crore focusing on inclusive development, welfare programs and expansion.

SANKALP means determination or commitment, in the context of the Chhattisgarh Budget 2026, it represent the government commitment to achieve overall development and improve the socio-economic condition of the people.

Total Budget size (2026-27), total budget outlay for financial year 2026-27 is approximately ₹ 1.72 lakh crore, this include ₹ 1.45 thousand crore in revenue expenditure and ₹ 26,500 crore in capital expenditure. The budget is balanced in terms of receipts and expenditure. It is presented under the theme SANKALP (Sankalp se Siddhi), signaling a focus on translating policy intent into implementation. Gross State Domestic Product (GSDP) for 2026-27 is projected at about ₹7.09 lakh crore with a fiscal deficit.

The key spending priorities in the budget include, major investment for roads, irrigation, rural and urban development. ₹9,450 crore for the Public Works Department, include new high speed corridors. Funds for drinking water ₹4,000 crore, irrigation 3,500 crore, rural infrastructure ₹3,000 crore.

Over ₹3,500 crore for health initiatives including expanded health missions, new hospitals, maternal child health units and rural health facilities. Strong allocations support farm income and irrigation through schemes like Krishak Unnati Yojna and related agro programs.

Creation of two Education Cities in a remote region with ₹100 crore allocation. Plus funds for school and higher education support. Special attention to tribal belts of Baster and Surguja division with infrastructure, tourism, livelihood, and security improvements.

Chhattisgarh Budget for 2026-27 is estimated to be roughly ₹1.72 lakh crore in total, which is more than the previous year's budget and shows the state's desire to increase development initiatives. By distributing money to industries including agriculture, health, education, infrastructure and social programs, the budget aims for balanced growth. The state's Gross State Domestic Product (GSDP) is estimated to reach around ₹7.09 lakh crore in the upcoming year, indicating consistent economic development.

Since agriculture is the foundation of Chhattisgarh's economy, agriculture and farmer welfare are among the budget's top concerns. The government has maintained programs that offer financial aid and support to paddy growers. Farmers receive compensation more for purchasing paddy under the Krishak Unnati Yojana; the total amount disbursed is estimated to be around ₹35,000 crore. The goal of this program is to boost the rural economy and increase farmer's income.

Infrastructure development is one of the budget's main priorities. The government intends to boost funding for transportation systems, urban development, roadways and irrigation projects. The budget's estimated capital spending of ₹26,500 crore would be utilized to construct new infrastructure and enhance connectivity throughout the state. This investment is estimated to generate employment opportunities and support long term economic growth.

Additionally, the budget places a high priority on social welfare and healthcare initiatives. Large sums of money have been set aside for extending health insurance coverage, constructing new hospitals and renovating existing medical facilities. For example, more than ₹3,500 crore has been set aside for health-related schemes, including the Shahid Veer Narayan Singh Ayushman Bharat scheme and the National Health Mission. To increase access to healthcare services in rural and tribal communities, new medical colleges, nursing schools, and health centers are being planned.

The budget also prioritizes gender focused programs and women's empowerment. To help women and girls, special programs have been implemented. One such initiative is the Rani Durgavati Scheme, which provides financial assistance of ₹1.5 lakh to eligible girls when they turn 18 years old, for Mahatari Vandan Scheme allocated ₹8,200 crore to support mothers under this flagship women's program and encouraging education and financial security. In

order to encourage economic independence, the government has also suggested incentives including lesser property registration fees for assets purchased in women's names.

The overall goal of the Chhattisgarh Budget 2026-2027 is to create inclusive and balanced development by emphasizing women's empowerment, infrastructure, healthcare, and agriculture. The state government's plan to boost economic growth while maintaining social welfare and raising the standard of living for its residents in the budget.

BUDGET IN BRIEF

Amount in Crore

S.No	Description	2025-26	2026-27
1	Gross State Domestic Product (GSDP)	6,31,290	7,09,553
2	Total Receipts	1,65,100	1,72,000
3	Total Expenditure	1,65,000	1,72,000
4	Revenue Expenditure	1,38,196	1,45,000
5	Capital Expenditure	26,341	26,500
6	Capex to Budget	16%	15.4%
7	Capex to GSDP	4.1%	3.7%
8	Revenue Surplus(+)/Deficit(-)	+2,804	-2,000
9	SASCI	4,000	8,500
10	Fiscal Surplus(+)/Deficit(-)	-18,900	-20,400
11	Fiscal Deficit as % of GSDP	2.91%	2.87%

Fiscal Indicators

Gross State Domestic Product (GSDP): Expected to be ₹6, 31,290 crore in the year 2025 -26, which is estimated to reach ₹7, 09,553 crore in 2026-27 with a growth rate of 12.4%.

Per Capita Income: Estimated at ₹1, 62,848 in 2024-25, which is estimated to be ₹ 1, 79,244 in 2025-26 with a growth of 10.07%.

Total Receipts: Estimated at ₹1, 65,100 crore for 2025-26, increasing to an estimated ₹1, 72,000 crore in the 2026-27 budget.

Budget Size: The budget size for 2025-26 was ₹1, 65,000 crore, while for 2026-27 it is estimated at ₹1, 72,000 crore. This indicates that the increase in expenditure is balanced in line with receipts.

Revenue Expenditure: Estimated at ₹1, 38,196 crore in 2025 -26, reaching an estimated ₹1, 45,000 crore in 2026-27. This increase reflects the expansion of social schemes and welfare programs.

Capital Expenditure: Estimated at ₹26,500 crore for 2026-27, which is 15.1% of the total budget and 3.7% of the GSDP. This shows a continued priority toward infrastructure development in the state.

Fiscal Deficit: Estimated at ₹20,400 crore in 2026-27. This is 2.87% of the GSDP, which remains with in the 3% limit set by the FRBM Act.

Revenue Deficit: The states revenue deficit for the financial year 2026-27 is estimated at ₹2,000 crore.

Comparison with Previous Fiscal Year (2025-26)

Metric	Financial Year 2025-26	Financial Year 2026-27
Total Budget Size	₹1.65 lakh Crore	₹1.72 lakh Crore
Total Receipts & Expenditure	₹1.65 lakh Crore	₹1.72 lakh Crore
Capital Expenditure	₹26,341 Crore(16% of Budget)	₹26,500 Crore(15.4 % of Budget)
Fiscal Deficit(% of GSDP)	2.91%	2.87%

Analysis of Above Table

The total budget has increased by ₹7,000 crore.

Capital standing is still strong to sustain the growth.

Fiscal discipline is maintained with deficit within limits.

SPECIAL ANNOUNCEMENT FOR WOMEN: DETAILED ANALYSIS

The Chhattisgarh Budget 2026-27(₹1, 72 lakh crore) priorities inclusive infrastructure, health, education, tribal development and social welfare while continuing support for women's empowerment and maternal support schemes. Fiscal indicators show a way increase over the previous year with sustained emphasis on balanced growth.

The Chhattisgarh 2026-27 SANKALP budget includes several female focused announcements including a cash transfer girls, Rani Durgavati Yojna ₹1.5 lakh when a girls turn 18 and 50% reduction in property registration fees for immovable property registered in a women's name, construction of Mahatari Sadans and strengthened maternal/child health infrastructure.

These have the potential to be revolutionary and politically significant, but their final impact depends upon precise eligibility requirements, funding projection, delivery methods and rule & regulations.

Education Sector Schemes

The Rani Durgavati Scheme provides ₹1.5 lakh upon turning 18, clearly supporting higher education or skill-building for self-employment. Skill development ties into youth initiatives with ₹1,097 crore for training like ITI programs and Competitive exams aid, benefiting women.

No specific digital literacy programs for women were highlighted, though general education expansions include, teacher recruitment.

Health and Nutrition Schemes

Mitanin welfare fund receives ₹350 crore, to support rural women health workers, ₹ 190 crore for PM ABHIM scheme, ₹183 crore for PM Jan Arogya Scheme, ₹2000 crore for National Health Mission these schemes support for better health. Mission Vatsalya Yojana gets ₹80 crore for women and child development, focusing on nutrition-sensitive cases. Healthcare infrastructure sees indirect boosts via social sector spending (40% of budget), and Cash less medical facilities for government employees.

Economic Empowerment Schemes

Mahatari Vandan Yojana allocates ₹8,200 crore, funded over 70 lakh women with direct transfers for financial inclusion and livelihoods. A 50% exemption on property registration fees promotes women's asset ownership and entrepreneurship. Construction of 250 Mahatari Sadans value of ₹75 crore will serve as hubs for SHGs meetings, training and economic activities.

Social Welfare and Safety Schemes

Enhanced pensions and welfare programs for women and children with ₹1,400 crore, strengthening our social security. The Mukhyamantri Lakhpati Didi scheme helps SHGs so women can gain financial independence. For safety, Mission Vatsalya protects vulnerable kids and families.

Table of key schemes:

CATEGORY	KEY SCHEME	ALLOCATION	BENEFICIARIES
Education	Rani Durgavati Scheme	₹1.5 lakh per girl	Girls age 18+
Health	Mitanin Welfare fund	350 crore	Rural Health Worker
Economic	Mahatari Vandan yojana	8,200 crore	70 lakh+ women
Infrastructure	Mahatari Sadans(250)	75 crore	SHGs & Community

Conclusion

Chhattisgarh Budget 2026 highlights a strong commitment to social welfare, women empowerment, healthcare and inclusive development. Schemes such as Mahatari Vandan yojana, Rani Durgavati Scheme and many more, schemes supports women, SHGs, Anganwadi expansion and healthcare, initiatives aim to improve the living conditions of vulnerable groups. These not only provide financial and social security but contribute to long-term socio-economic development and gender equality in the state.

COMPARATIVE ANALYSIS

The Chhattisgarh Government presented the SANKALP Budget for the financial year 2026-27 in the State Legislative Assembly. The budget reflects the government's priorities in area such as agriculture, infrastructure, social welfare and women empowerment. The 2026-27 budget focuses on inclusive development, regional growth and welfare schemes for farmers, women's and tribal communities. A comparison with the previous year's budget help to understand the changing fiscal priorities and policy direction of the state government.

Budget Size Growth

Net expenditure has grown at an average annual rate of about 13% over the past five years, driven by higher capital outlays expenditure and sectoral investments.

BUDGET YEAR	NET EXPENDITURE(IN CRORE)	YOY GROWTH	GSDP(IN CRORE)	EXPENDITURE AS % OF GSDP
2021-22	97,000	-	4,00,000	24%
2022-23	1,00,000	3%	4,38,000	23%
2023-24	1,21,495	21%	5,09,000	24%
2024-25	1,45,766	20%	5,65,845	26%
2025-26 RE	1,56,000	7%	6,31,290	25%
2026-27 BE	1,72,000	10%	7,09,553	24%

*YoY – Year over Year, *RE- Revised Estimate, *BE- Budget Estimate

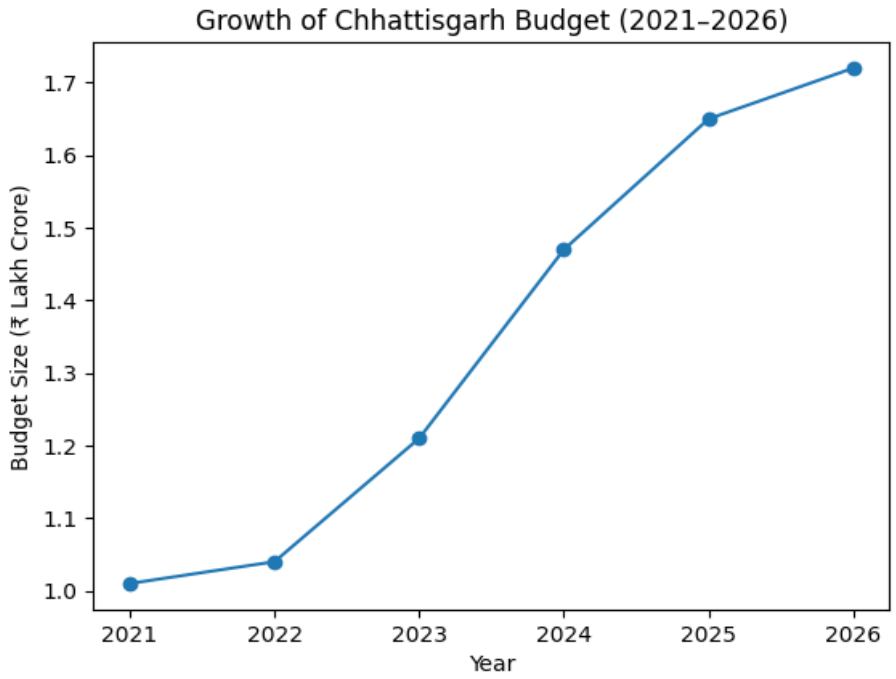
Key Expenditure Shifts

Capital expenditure jumps 63% to ₹ 26,500 crore in 2026-27 from ₹ 16,300 crore (2025-26 RE), emphasizing infrastructure like roads ₹ 7,403 crore and rural development (up 70%). Revenue expenditure grows at 4% to ₹ 1, 45,000 crore, with committed spending (salaries, pensions, interest) at 40% of revenue receipts.

Revenue and Deficit Trends

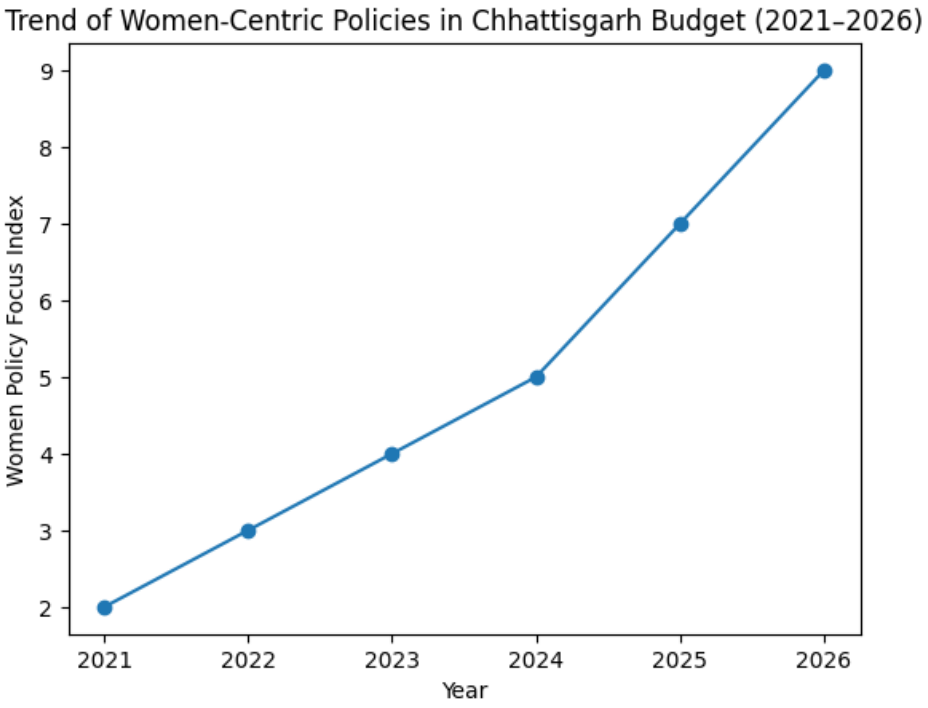
Revenue receipts reach ₹1, 43,000 crore, with own tax at ₹ 52,000 crore (7.3 % of GSDP) and mining non-tax at ₹ 19,000 crore. Fiscal deficit target 4.1% of GSDP (₹ 28,900 crore), slightly below 2025-26 RE (4.2%), while revenue deficit improves to 0.3% from 1.6%.

Graph 1: Budget Growth of Chhattisgarh (2021-2026)



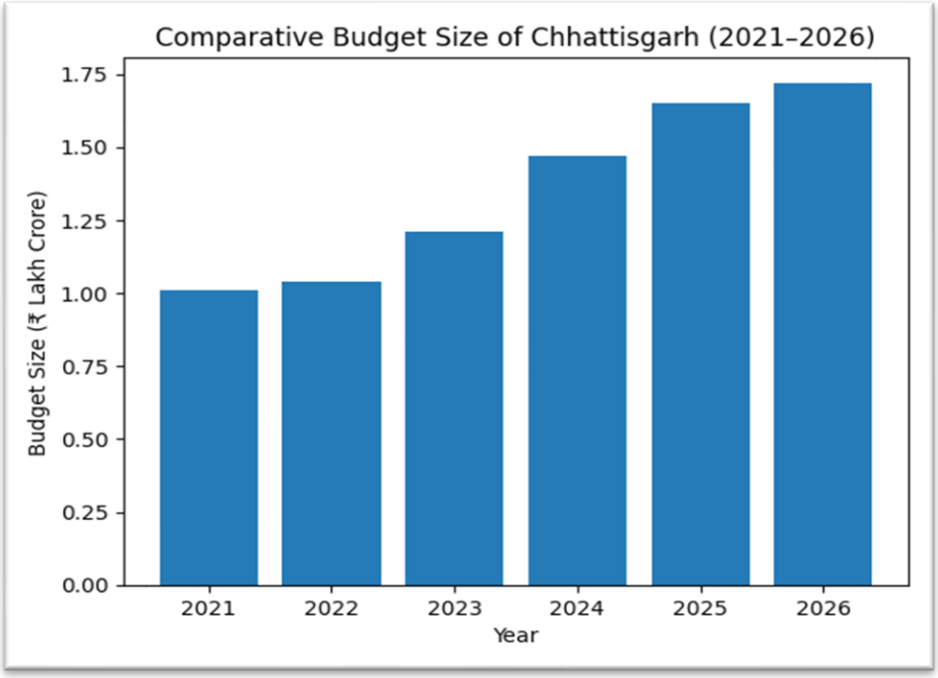
The graph shows a steady increase in the total budget size of Chhattisgarh from 2021 to 2026. The budget increased from ₹ 1,01 lakh crore in 2021 to about ₹1.72 lakh crore in 2026. This reflects the state's effort to expand development expenditure and welfare programs. A larger budget also says the government to allocate more resources for women empowerment schemes and gender- focused welfare initiatives.

Graph 2: Trends of Women-Centric Policies



The second graph represents the policy focus on women welfare and empowerment in the Chhattisgarh state budgets. Earlier budget mainly focused on nutrition, health services and support to SHGs, recent budget have introduced direct financial support schemes and girls child development programs.

Graph 3: Comparative Budget Size of Chhattisgarh (2021-2026)



The bar chart highlights the comparative growth in the state budget over six years. It's clearly shows that Budget 2026 is the largest among the previous five years. The increase in budget size provides more opportunities for women-focused policies such as Mahtari vandan yojana, Rani Durgavati Scheme and livelihood programs for women self-help groups.

Key Findings of Comparative Analysis

The budget size increased from about ₹ 1 lakh crore 2021 to ₹1,72 lakh crore 2026.

Women- focused programs have expanded from basic welfare to economic empowerment.

Direct financial schemes and property incentives show a policy shift toward gender equality.

The 2026 budget includes multiple targeted schemes for women and girls, making it one of the most gender- focused budgets in the state.

Conclusion

The comparative analysis shows that the Chhattisgarh Budget 2026 significantly strengthens women-centric policies compared with the previous five years. The introduction of scheme like Rani Durgavati Schemes, continuation of Mahtari Vandan Yojana and property benefits for women indicates the government's commitment to improving women's socio-economic status. These initiatives can contribute to financial independence, education and social for women, which are essential components of sustainable development.

FINDINGS AND DISCUSSION

The Chhattisgarh Budget 2026-27 places strong emphasis on women's empowerment, social security and economic independence. The state government has introduced several schemes and financial allocation aimed at improving the socio-economic status of women and girls. These announcements reflect the government's intention to promote gender equality, strength women's participation in development and improve their access to financial and social resources.

The budget prioritizes the Mahtari Vandan Yojana with ₹8,200 crore allocated, benefiting over 70 lakh women via direct cash transfers, since beginning over ₹ 14,000 crore has been disbursed. Rani Durgavati Yojana launches with ₹ 1.5 lakh grants to eligible girls at age 18, along side 50% registration fee waivers for women buying property and construction of 250 Mahtari Sadan community centers for ₹ 75 crore. Provisions also cover ₹ 800 crore for anganwadi centers to boost maternal and child nutrition services.

These initiatives blend direct financial aid with infrastructure, focusing on economic self-reliance for self-help group with Lakhpati Didi yojana and long- term security for girls, reflecting a shift toward inclusive growth in tribal regions. Allocation represent sustained priority with Mahtari Vandan scaling up amid proven reach, property fee cuts promote assets ownership in a state for women's.

The budget also places strong on healthcare infrastructure, including the establishment of new district hospital, maternal and child health units, and medical colleges. These improvements can strengthen the impact of women-centric schemes by ensuring that beneficiaries also have access to essential health and maternal care services. However, the success of these initiatives depends on the quality of implementation and availability of trained staff and resources.

Overall, the women-focused announcements in the Chhattisgarh Budget 2026 reflect an important step toward gender equality and women's empowerment. However their real impact will depend on transparent implementation, strong monitoring systems, and effective coordination with existing central and state welfare programs.

CHALLENGES AND LIMITATIONS

The Chhattisgarh Budget 2026 special announcement for women show a progressive commitment to gender-responsive governance, but its effectiveness may be limited by a number of institutional, financial and structural difficulties. A critical analytical perspective is necessary to evaluate these limitations.

Budget Constraints

Limited financial resources are one of the most significant obstacles to implementing women-centric initiatives. Although the total budget size appears to be large, competing priorities such as infrastructure development, agriculture, tribal welfare, health and education sometimes limit the amount of money available for gender specific initiatives.

Key concerns include: Inadequate gender allocation share, revenue dependency on central transfers, reallocation risks of women-centric schemes may face fund diversion and fragmented funding.

Implementation Gaps

Even well designed budget announcement may face implementation deficits at the ground level and major implementation challenges include:

Delay in fund release: Official procedure often slow down fund disbursement to district and local bodies.

Limited institutional capacity: Grassroots institution, especially in rural and tribal area of Chhattisgarh, may lack of trained personal to execute women-specific schemes effectively.

Lack of awareness: Many women, particularly in remote areas may not aware of newly announced schemes.

Digitalization: Increasing digitalization of welfare schemes may exclude women lacking access to smartphones, internet connectivity or digital literacy.

Social cultural barriers: Patriarchal norms may restrict women's access to benefits even when schemes exist.

Administrative Bottlenecks

Administrative inefficiencies can significantly limit the success of gender focused initiatives. These are some common bottlenecks include:

Inter-departmental coordination issues: Women- related schemes often require collaboration between departments such as women and child development, rural development, health, education and skill development. Poor coordination can lead to duplication or delays.

Centralized decision-making: Excessive centralization reduces flexibility at district and block levels to adapt schemes to local needs.

Staff Shortages: In many districts, frontline workers (Anganwadi workers, ASHA workers, field officers) are overburdened, affecting service delivery. Weak administrative data systems hinder accurate beneficiary identification and tracking.

Monitoring and Evaluation Issues

Effective monitoring and evaluation system are required to determine the true impact of specific announcement for women. However, there are a few limitation:

Lack of gender-disaggregated data: Absence of detailed gender specific data make evaluation more difficult.

Focus on input rather than outcomes: Budget analysis often measures allocations and expenditures rather than actual improvements in women's socio-economic status.

Weak accountability system: There may be limited independent audits or social accountability tools to evaluate scheme performance.

Limited research integration: Academic and policy research findings are not always integrated into budget revisions.

CONCLUSION

The analysis of the special announcements for women in the Chhattisgarh Budget 2026 shows that the state government has made a clear effort to strength women's welfare and empowerment through financial support, social security measures and institutional development. These announcements indicate a growing recognition that women's empowerment is essential for inclusive economic and social development. The budget reflects an attempt to combine welfare measures with long-term empowerment strategies so that women can participate more actively in the state's development process.

The total budget, ₹1,72 lakh crore, highlights women focused initiatives like Rani Durgavati Yojana, giving ₹1.5 lakh to girls at age 18 for education or future needs. Other steps include 50% cuts on property registration fees for women, building Mahtari Sadans (mother welfare centers), and boosting maternal child health units. These aim to boost financial security, assets ownership, and health access, especially in rural and tribal areas.

These approaches expand on India's gender budgeting since 2005, shifting from welfare to equality focused spending. They target education, health, skills and entrepreneurship, helping close gaps in literacy, jobs and maternal health in Chhattisgarh's tribal regions. If done right, they could raise school completion percentage, female workforce participation and household decision making power for women.

However, the study also highlights several challenges and limitations that could affect the success of these announcements. Budget constraints, administrative delays, and limited institutional capacity may slow down the implementation of women focused programs. In many cases, schemes fail to achieve their full potential because of poor coordination among departments, lack of awareness among beneficiaries, and inadequate monitoring systems.

Overall, the Chhattisgarh Budget 2026 represents a positive step toward strengthening gender responsive governance. The special announcements for women demonstrate policy commitment and provide opportunities to improve women's economic independence, social security and access to essential services. However, the real success of these initiatives will depend on effective implementation, adequate funding and continuous monitoring. If these challenges are addressed properly, the budget initiatives have the potential to contribute significantly to women's empowerment and sustainable development in chhattisgarh.
